

# Characteristic of Digital Medicine Technology for Future Application

Mohamed Ashfaq Hassan, MD

Affiliation: Cimbens

**Abstract:- A Prototype is prepared with new procedures and named as *Eemothrapy*, for which *Period table* has been divided into 2 modes toxic and non-toxic, and by analyzing raw energy that exist in the nature a conversion module was prepared and the raw energy is transferred and there polarity, frequency, intensity are changed so as to convert it into Digital energy and formed a Digital medicine.**

## I. INTRODUCTION

➤ *Prototype:*

*Eemothrapy (Ee-mo-therapy)* : Means use of Digital energy to treat the disease.

The Technology is planned on the basis of *Five(5)Major theories* and *Eleven(11)sub theories*, and *Metadata*. And has divided the period table in two modes, toxic and non toxic mode and non toxic Elements will be used in bundled form, diseases will be classified as per *Disease identification concept* and Medicines are prepared as per *Disease-Treatment-Module*.

*Five (5)Major theories:* Physiology,<sup>(1)</sup> law of Paracelsus,<sup>(2)</sup> Bio energy,<sup>(3)</sup> computer TCP/IP, <sup>(4)</sup> Conservation of energy.<sup>(5)</sup>

*Eleven (11) sub theories under Conservation of energy:* Energy transformation,<sup>(6)</sup> electrical energy, <sup>(7)</sup> electricity Vs energy,<sup>(8)</sup> Ionization,<sup>(9)</sup> Ion, <sup>(10)</sup> 1<sup>st</sup> Ionization, <sup>(11)</sup> Ionization energy,<sup>(12)</sup> Microwave, <sup>(13)</sup> Radio Frequency(RF), <sup>(14)</sup> Non ionization Radiation, <sup>(15)</sup> Molecule Interactions.<sup>(16)</sup>

➤ *Metadata:*

A proof for existence of energy in life and dead items. And then after developed a new process of extracting the energy is called “Taqahraj” (Taq-raj), and new testing and measuring process is called “Istikqias” (Is-ti-qias).

(Behind the scene information that is used everywhere in multiple ways and helped to organize)

The idea was to develop the medicine with fastest response which can save the life even in non availability of specific disease based medicine, and emergency non surgical medicine before a patient is transported to hospital. And we thought of using energy, moreover as

1. We are aware about the, digital communication of computer, that brain developed energy for communication with the body, magnetic power effects of high power magnets, homeostatic concept, energy measuring concept,

energy base existence of all the elements of periodic table, energy existence in plants and its products, energy existence in water, energy existence in air, disease classification and identification.

2. We are aware about the testing knowledge like digital computer hacking, energy testing of humans, Gauss strength of magnets and its effects, electrical (Amps, Volts, Watts, and Watt-hours), k/call of plants & its products, Hz measurements of Air, gram staining diseases.

3. We are aware about Allopathic, Homeopathy, Electro Homeopathy, Magneto Therapy treatment abilities and disabilities.

And planned to merge all the technology into on ship with best possible quick achievement

Energy= Allopathic + Homeopathy + Electro Homeopathy + Magnetism + all plants

Energy= Period table energy + Homeopathic energy + Electro Homeopathic energy + Magnetic Energy + Bio-energy of all Botanical substances.

With a concept of combining the energies of all forms in such a way that it should be testable, scientific provable, easily developable, easily merge able, easily manageable. This gives the direction to “law of conservation energy” and analyzing that

*Life:* Contain energy and is measurable

*Dead:* Does not contains energy and is not measurable

*Chemical Substances:* Chemical is extracted materials are those from organic / inorganic products and complex Substances of mineral origin or products.

*Chemical Preparation:* All preparation made from chemicals.

*Botanical Preparation:* Are preparation made from bio energy item.

*Botanical Substances:* Whole plants, roots, stems, barks, woods, buds, herbs, leaves, fruits, berries and seeds.

*Dead Botanical Substances:* All the dried up botanical substance are dead and energy cannot be tested & measured.

*Life Botanical Substance :*All the botanical substances who energy can be tested & measured.

*Dead Chemical Substance:* All the dried chemicals whose energy can't be tested, measured.

*Life Chemical Substance:* All the wet chemicals whose energy can be tested & measured.

*Dead Earth:* The dry earth whose energy cannot be tested & measured.

*Life Earth:* The wet earth whose energy can be tested & measured.

*Water:* It's always live and at any given time can be tested & measured and has the capability to bring life in dead substances.

*Bringing Life in Dead Earth:* By pouring the water on the dead earth makes it eligible to be tested and measured, then after many new botanical substances comes into existence.

*Bringing Life in Dead Chemicals:* By wetting the chemical with water makes it eligible to be tested and measured.

*Bringing Life in Dead Botanical Substances:* By wetting botanical substance with hot water makes it eligible to be tested and measured.

*Earth Properties:* Basic requirement of earth on which the complete botanical substance come into existence and are macronutrients, micronutrients example nitrogen, phosphorus, potassium, calcium, magnesium, sulphur, iron, manganese, chlorine, molybdenum, copper, zinc, boron.

*Period Table :* Are the basic elements on which the complex chemicals have been prepared.

#### ➤ *Eagle eye view*

*Homeopathy:* It's very well known about homeopathy the weak treatment power, long duration medication, with long list of food intake precautions.

*Unani medicine & Ayurveda medicine:* Medications are long term and with long list of food intake precaution.

*Allopathic:* Are fast and long duration control on brain over the pains sensing, and if the diseases is not getting controlled in some cases the surgery a deadliest tool.

Therefore a requirement for quick response medicine in needed, with some rapid action, non surgical medicine therefore a midway extraction and preparation along with amalgamation is needed. Therefore further more to

To

1. Bringing life in dead, and transfers the energy for each.
  2. And living energies from life needs to be transferred.
- Hence

*Hence:*

We analyzed these available medicines and found that Homeopathy: Is a weaker way needs ENA for preparation.

Electro Homeopathy: Is little quicker needs distilled water, for preparation.

Allopathic: Have side effects with chemicals so now

*Now:*

We thought that "law of conservation of energy" to different medium like water and *extra neutral alcohol* (ENA), but we found water is weak medium and ENA is a strong medium for storing the energy after transforming. On further analysis we found ENA is good medium but not bearable by human as consumption point of view, water is easily bearable by human body. Hence new gap filling

#### ➤ *New gap fillings:*

Based on analysis to transform the energy 2 mediums are available either water or ENA. Therefore New Method of extraction concept Taqahraj & testing method Istikqias came into existence, and selected the Preparation

methodology of *mixed energy*. Therefore *Eemotherapy is mixed energy conservation*. And prepared

#### ➤ Prepared:

Have prepared 3 core (Core 1, Core2, Core3) and 34 high forms and can be utilized as

Inject able Form: core 2, High form is suitable.

Inhaler forms: core 1, High is suitable.

Syrups : Core 1 is suitable.

Drops: Core 1, Core2, Core3, high is suitable.

#### ➤ *Disease identification concept:*

The disease is identified for the negativity and positivity for example by using either gram staining (gram negative or gram positive) or any other method as applicable.

## II. METHOD

#### ➤ *Disease-Treatment-Module:*

Many times the body require very complex medicine, since human brain creates energy to maintain the body and Magnetic field, uses period table based elements and some time creates symptoms at the Acupuncture based points. Therefore a proper understanding of disease identification, disease actions, and organs activity is required since act as a *port of communication*, and needs to be matched in *Multi feature energy module*. The backbone of this module is *tcp/ip concept* and period table.

(a) Disease identification: Disease Type,<sup>(17)</sup> polarity,<sup>(18)</sup> intensity.<sup>(19)</sup>

(b) Disease actions: affected parts, colonization or infection,<sup>(20)</sup> temperature management.

(c) Organs activity after disease actions: Hypo or Hyper function,<sup>(21)</sup> atrophy,<sup>(22)</sup> swelling.<sup>(23)</sup>

#### ➤ *Multi feature energy module:*

Each & every item that exists on the earth has energy. And Energy has

(a) Has ports of communication.

(b) Has frequencies.<sup>(24)</sup>

(c) Polarity has charge either positive or negative.

(d) Intensity can be changed (+10 or -10).

(e) Be non-toxic.

(f) Has stage, store or flow.

And hence creates a Magnetic Phenomenon.

#### ➤ *Note:*

Intensity: Either Delicate or Strong.

Flow: Means move, glide, slide, shake, mix, radiate, interact etc.

Frequencies: 2 or more frequency.

*Tcp/ip concept:* Any device if needs to communicate require exact port, after which you can send virus / bug or result oriented data.

*Note:* The virus / bug are sent to destroy the existence of (A). Therefore it set the example of energy coded in opposite way. Again I repeat all the computer technology is based on 0 (zero) and 1(one) or (on and off) module.

Similarly the medicine should act towards the disease too. Since disease also have either +positive or –negative charge.

A	B
10.10.10.10:6050	6050 : Any
Ip : Port	Port

*Period table:* The elements and its energy that exists in natural resources is in delicate form and by any means if the energy of it can be transferred to storage should be non toxic and if its treated then it becomes toxic therefore has to classify Period table<sup>(25)</sup> into toxic and non toxic.

*Hence to proof the prototype*

16 resources matching the ports (TCP/IP module) where identified and are (Table 1)

Vitamin – A (Retinol)	Iron
Vitamin – C (Ascorbic	Copper
Vitamin – B <sub>3</sub> (Niacin)	Manganese
Vitamin – B <sub>6</sub> (Pyridoxine)	Phosphorus
Vitamin – B <sub>9</sub> (Folate)	Selenium
Vitamin – B1 (Thiamine)	Zinc
Sodium	
Potassium	
Calcium	
Magnesium	

Table 1

Each resource polarity and intensity needs to be set by moving frequency to make it digital pattern which has to be justified using lab test and manual tests, where Digital Energy is measured and is to be mentioned in Proof of medicine preparation concept.

### III. PROOF OF MEDICINE PREPARATION CONCEPT

*For example, a model is prepared by name " fenu" and its states raw and medicated form with respect to TCP/IP model is prepared:*

Fenu is as IP ,and its ingredients are ports, and benefits of fenu are, commands to perform in the body. Which needs to be charged with +positive or –negative, and its intensity is changed, and frequency is achieved. The process of extracting the energy is applied "Taqahraj" and also testing and measuring process is applied "Istikqias", so that it gets capable to fight the disease and is made ready for injection .

Note : The digital test is performed after the medicine is prepared as below.

*Before*

*Raw Fenu Test (Table 2)*

Item	Current, A - -	Dc Volts, V-- --	Ac Volts, V ~
	2000 $\mu$	2000 m	200 v
Fenu Raw	160	800	1.3

Table 2

*After :- Preparation for inject able form*

*Medicated Fenu test (Table 3) :*

Item	Current, A	Dc Volts,	Ac Volts, V
Fenu	8	827	1.1

Table 3

Note : The digital test noted, as shown above.

Then After :- Tested in laboratory to get the Conformation on 16 ports (Table 4)

Vitamin – A (Retinol)	0.08
Vitamin – C (Ascorbic Acid)	0.39
Vitamin – B <sub>3</sub> (Niacin)	0.0
Vitamin – B <sub>6</sub> (Pyridoxine)	0.20
Vitamin – B <sub>9</sub> (Folate)	0.0
Vitamin – B1 (Thiamine)	0.0
Sodium	51.0
Potassium	480
Calcium	11.0
Magnesium	33.0
Iron	168
Copper	<0.01
Manganese	<0.01
Phosphorus	<0.01
Selenium	<0.01
Zinc	<0.01

Table 4

After successful *Proof of medicine preparation concept an Anti Blood Clot Module* was prepared as of below

*Anti Blood Clot Module:*

*Conditions:*

Blood clot in veins & arteries. Plaque formed due to fat accumulation in veins and arteries. Calcium Clots due to calcium deposits in veins & arteries.

*Reasons / stage:*

Blood clots due to vitamin C destruction & plaques formation due to lipids management, calcium toxin in calcium clots.

*Consequences:*

Poisonous dry blood, puts the pressure on heart, obstructed to the flow of blood.

Based on the above scenario the Disease Treatment Concept, port needs to be fetch out with respect to TCP/IP port module and is identified in (A) Port

#### (A) Port

Blood Clot, poison in clotted blood, plaques, calcium clots, toxic calcium, vitamin-C, lipid clots, pulse rate, blood pressure. Now after the identification frequency, polarity, intensity needs to be set so that communication can be established. For which 16 elements and resource identified as Commiphora wightii and Aurantiifolia which will act as a command to anti plaque. Then process of extracting the energy “Taqahraj”, along with testing and measuring process “Istikqias is applied so as to set frequency, Polarity, Intensity and is bundled in the medicine prepared to accomplish the tasks identified in (A) port so as to Un-clot the blood, send poison to the drain location, dissolve plaques, dissolve calcium cloths, send toxin of calcium to drain location, Vitamin-C management, dissolve lipid clots, control pulse rate, control blood pressure.

The prepared medicine must contain energy’s in “on” and “off” patterns or “0”zero and “1” patterns so as to be acted as digital pattern. The test is performed as below.

### IV. RESULTS

Test results of the lab (Table 5)

Vitamin – A (Retinol)	0.10
Vitamin – C (Ascorbic Acid)	0.45
Vitamin – B <sub>3</sub> (Niacin)	0.0
Vitamin – B <sub>6</sub> (Pyridoxine)	1.49
Vitamin – B <sub>9</sub> (Folate)	0.0
Vitamin – B1 (Thiamine)	0.0
Sodium	5.77
Potassium	63.9
Calcium	3.35
Magnesium	23.70
Iron	116
Copper	<0.01
Manganese	<0.01
Phosphorus	<0.01
Selenium	<0.01
Zinc	<0.01

Table 5

Energy test of the medicine as of below (Table 6)

Current, A –	Dc Volts, V--	Ac Volts, V ~
3	746	0.9

Table 6

Digital medicine will be available in the form of loaded syringe (1ml) in units.

### V. CONCLUSION

Hence this technology gives new direction in all fields of medical treatment to improve health care and save life’s and can be widely applied to improve the health of patients quicker since the total activity expected time is 15-20 minute.

And the educational pre-requisite needed to understand Eemotherapy is

- Modern medicine disease & diagnosis technology (MBBS)
- Electricity (Electrical)
- TCP / IP (Computer)
- Bio-Chemic
- Bio Energy
- Electro Homeopathy
- Knowledge of plants / Vegetables / fruits / flowers etc.
- Period table
- Magnetism
- Acupuncture
