**Abstract:-** Physical classroom is no longer be able to do take classes in younger generations, Due to covid-19 covid- 19 is a pandemic says WHO. In various problems faced by the students and teachers in India . online education is first time in many years ago Started a traditional education system, and this traditional system used in India before the covid-19.but it was not possible nowadays,Various problems faced by students and teachers like internet connectivity issues, those students can live in villages they don't have mobile phones and internet connectivity so these students are loss to their

studies. Many negative sites of online education like limited collaborative learning, increase in time and take several efforts. Several arguments are associated with e-learning, Accessibility, affordability, flexibility, learning pedagogy, life-long learning, and policy are some of the arguments related to online pedagogy. It is said that online mode of learning is easily accessible and can even reach to rural and remote areas.

**Keywords:-** COVID-19, Online Education Accessibility, Affordability, Flexibility, Learning Pedagogy.

## I. INTRODUCTION

Fig 1

Online Education is important for a new generation and education is a need to persons to live with life. Online Education can be done with the help of internet and computer, laptop, android phone, Smartphone etc. All over the world online Education is started on 22 march 2020 due to COVID-19 the World health organization says COVID-19 is pandemic. And it's a viral disease so in India had lockdown Due to schools and colleges are shutdown and all over the world 1.6 billion students are in home and take online Education.

Online Education can be easy , comfortable, and students can their own time to attend lecture and Those students are preparing for competitive exams like NEET, CA, UPSC, they have extra time to study. Students are not travel and they save traveling charges . In India zoom, Skype, google meet, google classroom those apps used for lectures and In past few years some online learning platform used in India for competitive exams like NEET CA UPSC apps like academics ,byju's, vedantu. These apps are most popular to study online. In this situation every house is a

school/college and every parents are teacher. Online learning is Important in this situation . Online education is a course format where students and instructors Correspond and interact using virtual methods such as: email, Web conferencing, And learning management systems and are delivered asynchronously, With the advent of internet and computers online education has become very popular. It is very Convenient and easy way of learning. Students learn online with the help of their computers students Don't need to carry heavy bags . Students and teachers face sometimes internet connectivity & Speed problems. Students teachers bonding will lost sometimes. Students eyes are fixed in small screen And doubts are muted. The impact of covid-19 is observed in every sector around the world. The education sectors of India as Well as world are badly affected by this. However impact of covid-19 on education has few positive approach apart from the negative aspects of the Pandemic approach apart from the negative aspects of the pandemic Positive impact of covid-19 on education is also there.

Covid-19 has accelerated adoption of digital technologies to deliver education. Educational institutions moved towards blended mode of learning. In encouraged all teachers and students to become more technology savvy. The pandemic situation induced people to learn and use digital technologies. Online learning also called e-learning, CBSE board start in Many years ago " e-pathshala" based on NCERT syllabus. And e-pathshala was started after few years in app form and in this app available in Written and audio books. Online learning is a system based on formalized teaching but with the help of electronic devices like Mobile phone ,laptop, computers and tabs.

In India and all over the world started mostly online education starting from 22 march 2020 due to COVID-19. Covid-19 is an pandemic disease says the world health organization. It's an infectious disease Caused by a newly discovered coronavirus .travelling expenses and time is saved which now can utilize in learning new things and focusing on Studies and feel safe that students can continue the studies without contacting anyone and safe from covid.

Faults : the only thing about online education is that practical knowledge about is not as I learned in Offline education. Due to COVID-19 all schools and colleges are shutdown. Over 3billion students in home .In many past Years ago all peoples are not take education due to time and money problems. In online platform Required few money's required and yours comfortable time you choose. In recent research suggests that online platform has been shown to increase retention of knowledge and Information, and take less time. All over the world 186 countries are affected by covid-19.In India and all over the world follow a traditional education system like " Chalk and black board, duster System. But online education affects medical students. Those students don'ts any practical Experience/knowledge and we given to the next generation 50% knowledge of Doctors, pharmacists Scientists, Radiologist etc.Medical students have no knowledge about patients and doctors interaction. Before the covid-19 many online app /platform had to provide online knowledge BYJU'S, Vedantu,

Uncademy ,grade up for competitive exams like NEET, UPSC. They provide live online lectures. Online education is new way of learning students at all ages. Online education gaining popularity in last few years. Lectures can be taken number of times. A big piece of new and necessary information Appears every minute nowadays online study or learning turns out to be more and more practiced Competition between students can be very stimulating and students will only benefits from it.This times these are truly helpful in providing continues and un-interrupted learning. Self curfew to push back the threat caused by the Novel Corona virus (Covid-19) outbreaks. Mobile and Computers screen spreads some dangerous rays and these affects the eye some time cause lung cancer. In the next 20years most of the peoples /students may cause cancer and 80% peoples had spectacles .While some believed that the unplanned and rapid move to online learning with no training band width and little preparation .In Maharashtra "SWAYAM PORTAL" started many online courses in past few years. To

students gets more knowledge about the particular subject or particular stream. The imperial college London Started offering a course on the science of coronavirus , which is now the most enrolled class launched in 2020 on course. But in online platform many students are not connected due to prior network connection and also villagers are not have been internet connection so these students loss.

Benefits: we can provide online education in the format of film are daily soaps like TV shows or in the from of comedy and web series to helpful to those students are not like to study and are addicted to TV.We can shoot a some 1to 2 hours lecture shows serials and show on TV It gives profit to government and students also,students can save the lectures to see at the study time and clear all doubts during study. Most of the students like study at night and then of course teachers are not available that time so we can see those lecturers. They can save the time as well as travelling charges. Due to online education students can do the part time job which can ultimately help in financially.

## II. CONCLUSION

Online education is the best way of learning than traditional , but many of the disadvantages of this format . Student & teacher interaction loss .but is needed for this time due to Covid-19. student can attend lectures from anywhere and teachers take lectures from anywhere and any time and those lectures are recorded for future reference and this facility is not available in traditional education system. Online education is a growing and adventurous new path to learn about almost anything. However, education online is different from learning in a face-to-face setting, and it is important to think about your goals, your needs and your interests before committing yourself to something.
